CLOSER TO HEAVEN

Ethiopia's 'church in the sky' is arguably the most inaccessible place of worship on earth, perched on top of a vertical spire of rock and 200m drops on all sides. The monolithic church, located in northern Ethiopia in the Tigray region, is 2,600m high and must be climbed on a vertical rock with bare feet to reach it, making you wonder how families grit it out to visit the church for Sunday services.
